

# Opal Smart Chart

The Opal Smart chart is the world's first **Opal appraisal software!** It generates an accurate and up to date dollar value for any variety of Australian Opal.

The program asks a series of fully illustrated questions relating to the characteristics of the opal being appraised - a simple mouse click on the relevant photograph in each question is all that is required to generate the value of your Opal.

The printout **Certificate** lists all questions and their answers along with value of the Opal in either wholesale or retail terms, as required.

The Opal Smart Chart was developed by opal dealers over a 40 years Opal Industry experience. It is in use with Appraisers, Retailers, Miners, Cutters and gemologists worldwide.

All terminology used conforms to the CIBJO (World Jewelry Confederation) official Opal Nomenclature.

In addition to providing an **opal appraisal & valuation** tool the Opal Smart chart also has a comprehensive *information section* on opal. Hundreds of superb ( enlargeable ) photographs of opal varieties and an extensive help section are provided

There is a **30 day money back policy** if not satisfied with the product. It may be run 20 times prior to registration and can be returned within this period. However once registered no refund will be provided.

Specifications and operation: The Australian Opal Values guide comes on a CD designed to be run in a Windows environment Win98 or later including Windows 2000, XP. (Please note there is no Mac version available at this stage). A computer with CD reader and hard disk capacity with minimum of 90MB free is required. Setup is automated when the disk is loaded.
